

## HOUSTON STUNTMEN'S ASSOCIATION

The Houston Stuntmen's Association (HSA) boasts a highly skilled group of professional stunt players with extensive experience in a variety of venues. These venues include film and television productions, commercials, industrials, live shows and accident reconstructions.

Professional stunt people make perfect test subjects for accident reconstructions because of their superb physical abilities and focused attention to safety. All HSA members are trained thoroughly in all aspects of the stunt industry, especially in following directions and for being able to adapt and respond safely to unexpected situations.

Every stuntman and stuntwoman in HSA is experienced in standard utility stunts. These include fights, pratfalls, stair falls, low falls, window crashes, precision driving and simple car crashes. Many members specialize in advanced vehicle stunts such as crashing, ramping and rolling cars, trucks (including semis), ATVs and motorcycles. Water stunts include jet skis, boats, wet bikes, propeller impacts and towable recreational tubes. Other specialties include partial and full body burns, train stunts, horse work, jerk and descender stunts, flying wire stunts, high dives and high falls. HSA can also provide members who hold commercial driver licenses (Class A) and members who are certified divers.

David "Stutter" Sanders founded the Houston Stuntmen's Association in 1986. His 30 year career as a stuntman was a natural transition from his college accolades. Sanders earned the distinction of All American NJCAA Gymnast and excelled as a member of the United States High Diving Team. He performed fire dives and 100 ft. high dives at both The Great Adventure in Jackson, New Jersey and at the famous Astroworld in Houston. A chance meeting with a Hollywood stuntman convinced him to pursue a stunt career. Through diligence and a stellar work ethic, Sanders became the premiere stuntman and the most sought out stunt coordinator in Texas. His outstanding physical talents combined with his dedication to safety on the set, firmly established Sanders in the stunt industry. He is highly regarded by his colleagues and maintains an exceptional professional reputation.
